Our Picks!

Lucy and the bully / by Claire Alexander 2009

Lucy is good at drawing & making things at school. But there's a bully at school, & he's very mean to Lucy. She can't tell anyone the bully rips her books & breaks her things, because he told her not to - or else! The simple story & illustrations will help young children talk openly about bullying.

Creative solutions to enhance nursing quality / Bruce Alan Boxer, Ellen Boxer Goldfarb 2011

Each creative solution entry begins with a narrative description & the environment in which it was developed, a summary of how it was originally used to enhance quality, & its overall efficacy in meeting its purpose. The next section provides the essential ingredients & step-by-step instructions for the implementation of the creative solution including a timeline, noting specific anticipated milestones.

Improving health in Aboriginal & Torres Strait Islander mothers, babies & young children: A literature review /

Primary Health Care Research & Information Service 2015

This literature review synthesises evidence related to programmes & initiatives to improve the health of Aboriginal and Torres Strait Islander mothers, babies & young children. It includes an examination of workforce needs & challenges in this area, particularly in the context of working with vulnerable families and across different sectors.

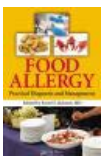

Available on the internet - <http://tinyurl.com/hkeqqak>

The child psychotherapy treatment planner / Arthur E. Jongsma, Jr. 5th ed., 2014

Features treatment interventions for anxiety, attachment disorder, gender identity disorder, and more. Organised around behaviourally based presenting problems including academic problems, blended family problems, children of divorce, ADHD, and more.

Food allergy: practical diagnosis and management / editor, Scott H. Sicherer 2014

Chapters begin with clinical questions to focus readers & contain numerous case studies to help formulate best practice approaches to patient care. Chapters cover clinical manifestations, triggers and cross-reactivity, acute reactions, and skin, gastrointestinal, and respiratory conditions associated with food allergy.

New Cochrane Systematic Reviews

Sweet tasting solutions for reduction of needle-related procedural pain in children aged one to 16 years

Objectives: To determine the efficacy of sweet tasting solutions or substances for reducing needle-related procedural pain in children beyond one year of age.

Available on the internet – <http://tinyurl.com/qj4g92p>

Pharmacological interventions for pain in children and adolescents with life-limiting conditions

Objectives: To evaluate the evidence on the effectiveness of different pharmacological interventions used for pain in children and young people with life-limiting conditions.

Available on the internet – <http://tinyurl.com/jzbuheo>
